

Jennifer,

Here is the language which should be used for Gas Daily. It has been revised and approved by Mark Taylor:

Daily price midpoint example (For Gas Daily, Oklahoma-PEPL):

The Index for a day shall be the Daily Midpoint price published on such calendar day under the heading "Daily Price Survey" in the Oklahoma - PEPL section of Gas Daily, or if a calendar day is not a business day then the price used shall be the Daily Midpoint price published on the next succeeding business day.

Please proceed with substituting as required to complete the index updates.

Thanks,

Dave
