Dear Gordon,

Let me help you improve Continental:

I have called customer service three times in order to receive a confirmation of my upcoming flight. I have asked for an eticket confirmation sent to me via regular mail and an e-mail. My flight is now nine days away, and I still haven't received any confirmation. If you can't handle the simple task of sending a letter or an e-mail, how can I trust you to run an airline?

This is not the first time I have had problems with your company. After having used the online services of American; United; and Continental, I have found your service to be vastly inferior.

Although it is difficult to avoid Continental when flying out of Houston,
I am going to do my best from now on.

Would you like a response from someone at Continental? Yes
