

Attached is the new site map file for auctions. It has been modified to reflect the ordering of the global nav and the removal of the ATA, which is no longer needed.

The View/Accept Contract screen will contain text cut which is currently in the About Storage Services section (I will modify the text file accordingly when received from Haakon).

Note that we are planning on using the same template as represented by the Market Info. screen in EnronOnline, although there will be a unique set of graphics for each of:

- 1) The Auctions Home Page
- 2) All of the EnBank pages (which will share the same graphic treatment, with appropriate title amendments).

Dave
