

Reagan,

I've requested the issuance of a draft master (gas) for Clarksdale. Yazoo has theirs in hand, but I haven't heard any of any comments.

The power side is a bit more complicated. Yazoo City and Clarksdale have not cut a deal between them to determine how to buy power - whether it should be bought by MDEA (easier in some accounting respects, but credit is more of an issue) or by the individual Cities.

Maybe this should be on the list for our 300 meeting.

Kay
