Subject: Me and Willis Tree Farm

Just wanted to let everyone know I started a new job last Friday:

Pipeline Power Partners

10000 Memorial Drive, Suite 200

Houston, Texas 77024

713-290-8762

I'm back working on compressor stations and gas storage projects with some of the guys I worked with on the Columbia Gas Compressor station in '93-'94. Note new email address also.

Barry called me last week about the well pump. It was not working and he had tried everything he knew to do. We decided to call Western Water Well Service in Conroe to check it out. Bottom line-it was beyond repair and we had to replace at a cost of \$765.52. When our tenant at the time took it upon himself to dig a new well (\$1500) he had them put in a real cheap pump-so that's why it went out in a relatively short period of time. We now have only \$90 in the account so everyone needs to think about making a contribution sometime soon. If you have a question, please call.

Conrad
