

FYI -

Public comments were recently posted in response to the FTC's February 2001 notice seeking information regarding different regulatory approaches to competition in the retail sale of electricity. Below is a list of contributors.

If you are interested, you may view comments at <http://www.ftc.gov/os/comments/eleccompetition/index.htm>. We have also posted the comments on the internal Deregulation Info Central site (<http://eeshou-ln3.ees.enron.com/energyservices/deregulation.nsf/Home+Page/Start?opendocument>).

Alternatively, I have a number of complete sets of all comments (the set comprises two big binders) at my desk.
