

Kim,

The NGI daily prices got messed up somehow when I ran the data fetch program. I updated them in this file now but I figured you would use GDD prices anyway. I have also attached the NGI monthly index which is usually the way we use NGI prices, as you indicated. I just thought you wanted daily prices originally and wanted to show them from the 3 different sources for comparison. Sorry for the confusion.

Let me know if you need any more assistance.

Thanks,

Charlie
