

Mary,

A list of OBA concerns for possible tariff revisions are as follows:

1. A mechanism to assure Operators remain within an acceptable tolerance (5%) on a daily basis, or receive a penalty.
2. A mechanism to require specific reconciliation periods (Quarterly).
3. A mechanism to require specific periods to allow a final contract disposition to a "0" balance, upon reconciliation.

The above suggestions would reduce the misuse of the OBA contacts.

Thanks

Robert
